✖

aws_instance.demo: Refreshing state... [id=i-0611602b0d1935e89]

Changes to Outputs:

+ public_ip = "3.238.93.38"

You can apply this plan to save these new output values to the Terraform state, without changing any real infrastructure.

Note: You didn't use the -out option to save this plan, so Terraform can't guarantee to take exactly these actions if you run "terraform apply" now.

PS C:\Users\jagad\OneDrive\Desktop\terraform demo\Day-1 providers and EC2 resource creations> terraform apply

aws_instance.demo: Refreshing state... [id=i-0611602b0d1935e89]

Changes to Outputs:

+ public_ip = "3.238.93.38"

You can apply this plan to save these new output values to the Terraform state, without changing any real infrastructure.

Do you want to perform these actions?

Terraform will perform the actions described above.

Only 'yes' will be accepted to approve.

Enter a value: yes

Apply complete! Resources: 0 added, 0 changed, 0 destroyed.

Outputs:

SESSIONS
